

How to Remove your software license

Example step by step license removal

Software license removal

- The procedure shown in this demonstration is the same for all our software products
- This Example uses one of our software to demonstrate the license removal process
- It shouldn't take you more than few minutes to complete!

Software license removal METHOD 2

There are 2 methods available to remove software licenses.

We will go through METHOD 2 in this presentation!

Software license removal METHOD 2

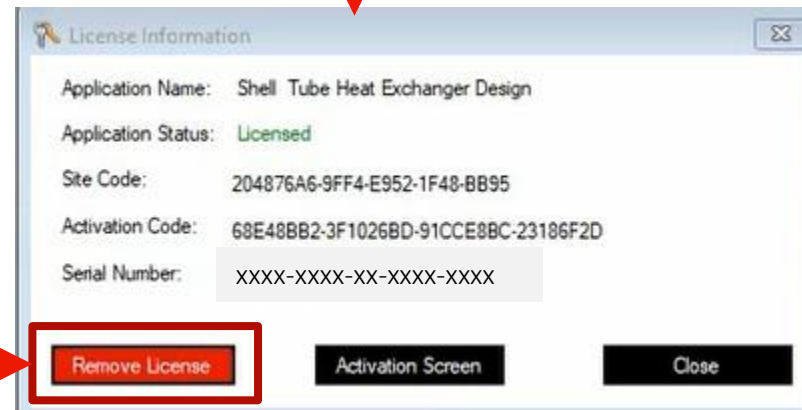

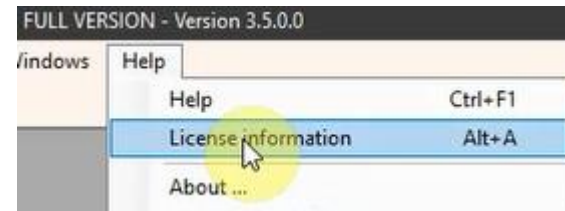

METHOD 2

1. Run the software

Software license removal METHOD 2

2. Find the license information screen,
Normally under Help > License information

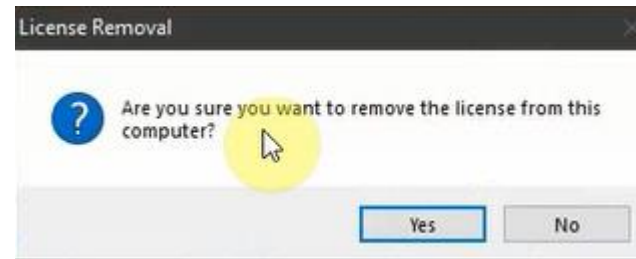

3. Click on "Remove License" button

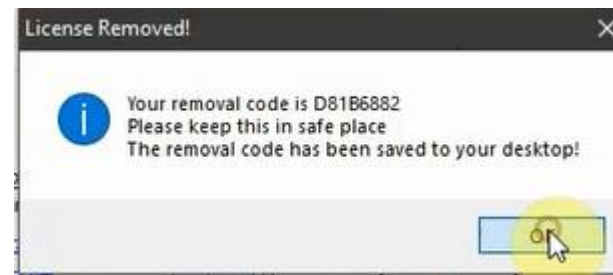

Software license removal METHOD 2

4. Click on “Yes” to confirm license removal

5. The software will generate a removal code and save it to your desktop.

*Keep a note of the “Removal code”
as it’s needed for next steps!*

Software license removal METHOD 2

6. Visit the activation center

<https://license.webbusterzengineering.com> or
<http://license.webbusterzengineering.com>

The login form should be displayed as below;
